

*Keep those babies warm
with their very own
CALF JACKET*

Calves under three weeks of age are under cold stress at

60 degrees Fahrenheit.

Instead of maintaining body conditioning and continuing optimal growth and immune function health, calves need to use more energy to keep warm

During the cold of winter, CP Feeds can help keep your calves warm and healthy.

Calf jackets, like the one pictured, can be purchased from your dairy consultant or CP Feeds at 920-775-9600.

16322 West Washington St
Valders, WI 54245

DID YOU KNOW:

- ❄ Calves <21 days old experience cold stress at 60 degrees Fahrenheit.
- ❄ Calves >21 days old experience cold stress at 42 degrees Fahrenheit.
- ❄ Blankets are especially beneficial for young calves.
- ❄ Blankets are ideal when transporting calves in cold weather.
